

MEINERTZ Church Convectors

Uses

MEINERTZ convectors are an obvious choice when churches are refurbished and a new heating system is needed. The MEINERTZ solution makes it possible to mount the convectors underneath the church benches, ensuring an even and comfortable heat in the room.

Bespoke solutions

All convectors are bespoke to match the length of the church benches. It is therefore possible to order a convector of for instance 2236mm. Choosing a convector matching the exact length of the bench will give a unique look.

Product

Following models are recommended for an efficient result; CL0720, CL0730, TL0720 or TL14300. The difference between the CL and the TL model is that CL convector ends have visible joints whereas the TL doesn't. Other models can also be used, and MEINERTZ can assist in choosing the correct convector for the project.

Pipework

In order to minimise the pipework and create the best water flow, baffle plates are welded internally in the convectors. Inlet and outlet can be placed at the same side, so that pipework can run along the walls. Also, more units can be connected in series.

Bespoke brackets

MEINERTZ has designed a bracket for mounting the convector underneath the bench. This can also be ordered with bespoke dimensions to match the project.

Surface finishing

MEINERTZ Church Convectors can be supplied, powder coated in any RAL-colour, free of charge.

Packaging

MEINERTZ Church Convectors are carefully packaged in strong cardboard and wrapped in PE sheeting.

Warranty

We offer a five-year guarantee against defects in materials or workmanship, provided that the unit has been correctly handled and installed.

Maintenance

MEINERTZ Church Convectors are very easy to clean and may be performed with ordinary cleaning agents that do not contain abrasive. Scratches or damages to the surface lacquer may be repaired using traditional spray paint, or by hand-painting with a thin brush.

Service

MEINERTZ sales consultants follow the entire process of a project - from idea to final delivery. Due to the experience gained from orders both nationally and internationally, MEINERTZ can ensure a professional service within deliveries to churches.
